ThreeTrees

UNLOOP

Press Kit

Introduction:

Unloop is an elegant, relaxing puzzle game about using clever mechanics to connect and remove portals. Simple, minimal design and a soothing soundtrack aim at a calm, stress-free experience.

Made without text or tutorials, with the fundamentals and mechanics taught through careful level design alone, Unloop let you feel progress with each level solved.

New elements and mechanics are added every few levels with an introductory level followed by some with slowly rising challenge, while the overall difficulty increases steadily. However, care has been taken to make Unloop playable for everyone, no matter how skilled they are with puzzles – so there is no crazy difficulty and the puzzles are strictly based on logic and connections – no guesswork required. And if one gets stuck, it's possible to skip levels from time to time… The difficulty fits adults and children alike.

A total of 150 levels with a playtime of 15-20 hours.

Platforms:

Unloop is available on Steam for desktop, mobile versions for phones and tablets are available on Google Play Store and Apple App Store.

Release Date:

September 19th, 2023

Price:

Steam: 1.99 €/$
Mobile: 40 free levels, all 150 Levels: 1.99 €/$

ThreeTrees is a solo project of me – Jurij Galievskij, Ukrainian/German indie game developer. After working for many years on industrial control soft- and firmware, I decided to switch to something that I always had a great passion for – puzzle games that inspire creativity and passion. I spent 2.5 years making Unloop, my first game I have wanted to make for a very long time.
